Spark Tamers — How to Play

Goal

Pick a partner creature, explore four neon wilds (Glowmeadow, Static Marsh, Ember Ridge, Nightspire), catch new creatures and beat the four Wardens guarding each gate. Beat Grand Tamer Nyx to become Grand Tamer. There are 15 creatures to catch, including the rare Aurorath.

Controls (phone)

Walk: put your finger anywhere on the map and drag in a direction, like a joystick. Arrow keys or WASD work on a computer.

Team button: see your creatures, their HP and moves, and choose your lead. **Sound** button: mute or unmute.

In battle, tap the big buttons: Fight, Orb, Team, and Run / Potion.

The map

Tall grass: wild creatures can appear while you walk through it.

+ Shrine: step into it to fully heal your team and save.

$ Shop: buy Orbs (20g), Potions (25g), and from Static Marsh on, Bright Orbs and Prism Orbs. Creatures in storage can be swapped in here.

! Gate: a Warden blocks the way north. Win to open the gate for good.

Battles

Choose one of up to 4 moves. Each move shows its type and power, and says STRONG or weak against the current foe. The faster creature moves first.

Types: Ember beats Leaf, Leaf beats Tide, Tide beats Ember. Volt beats Tide but does nothing to Stone. Stone beats Ember and Volt. Shade hits Shade hard. A creature using a move of its own type gets a 1.5x bonus.

Support moves: Focus raises attack, Brace raises defense (up to 2 times each), Mend heals 40% of max HP.

Defeated foes give XP to your active creature, and the rest of your team gets half. Creatures learn moves as they level and evolve at levels 16 to 18.

Catching

Weaken a wild creature, then use Orb. The button shows your exact catch chance, which rises as the foe loses HP. Rarer creatures are harder to catch. You can carry 6 creatures; extra catches go to storage.

You cannot catch a Warden’s creatures.

If your team faints

You return to the zone shrine with a healed team and lose a quarter of your gold. Your progress is kept.

Tips

Catch at least one creature of each type so you always have an advantage.

Raise a few creatures to about the level of the Warden’s strongest creature before challenging them.

Progress saves automatically after every battle and at shrines. Use Continue on the title screen.
