Bounce Brawl — How to Play

Goal

You are the cyan blob with the white arrow. Seven bot blobs join you for a 6-round party brawl. Each round awards points by placing: 10, 7, 5, 4, 3, 2, 1, 0 (the Final Crown round counts double). Most points after round 6 is the Brawl Champion.

Controls (phone)

Move: touch anywhere on the left side of the screen and drag, like a joystick.

DASH (pink button): a burst forward. Dashing into a blob knocks it much harder and stuns it briefly. 1.35 s cooldown.

JUMP (blue button): hop over beams. Landing makes a ground-pound shockwave that shoves nearby blobs.

Buttons grey out while on cooldown. On a computer: WASD or arrows to move, Space to dash, J or Shift to jump. The music-note button mutes sound.

The rounds

Shrink Ring / Bumper Ring: the platform shrinks. Fall off and you are out. Last blob standing wins; the rest are ranked by when they fell. Bumper Ring adds glowing bumpers that launch you.

Spin Sweep / Double Sweep: red beams spin around the centre and speed up. Jump them or get swatted off.

Crown Chase / Final Crown: 40 seconds. Grab the crown, then keep it. Dash into the holder to steal it. Falling off drops the crown and respawns you after 2 seconds. Ranked by time held.

Tips

Fight near the middle and push others toward the edge.

Dash is your attack, but it can carry you off the edge too.

A dashed blob is stunned for a moment: follow up with a second hit.

Bots: Chill, Normal or Spicy, chosen on the title screen. Your best total is saved.
