Neon Flush — How to Play

Goal

Neon Flush is a poker roguelike. Each ante has 3 blinds (Small, Big, Boss) with a score target. Beat all 24 blinds across 8 antes to win the run. Miss a target before your hands run out and the run ends.

Controls (phone)

Tap cards to select up to 5 (they lift and glow). The live preview shows the poker hand and its score.

Play Hand scores the selected cards (4 hands per blind). **Discard** swaps them for new cards (3 per blind). **Sort** switches rank/suit order.

On a computer: click cards, Enter to play, D to discard. The music-note button mutes sound.

Scoring

Score = Chips × Mult. Each poker hand has base Chips and Mult (Hand Values on the menu). Every scoring card adds its rank as Chips (faces 10, Ace 11). Then each Wildcard you own applies its bonus, left to right.

Night Market (shop)

After each blind you earn $3 plus $1 per blind tier, $1 per unused hand and $1 interest per $5 held (max $5).

Buy **Wildcards** (up to 5) that add Chips, Mult or multiply Mult; buy **Planets** to level up a poker hand; reroll for $2; sell Wildcards for half price.

Tips

Early on, take flat +Mult and +Chips Wildcards; later, x Mult cards (Prism Eye, Ace Pilot, Last Call) win runs.

Use discards to chase flushes and straights. Hold money for interest when the shop is weak.

Runs auto-save between blinds: Continue Run resumes at the next blind.
