# Ember Isle: How to Play

Ember Isle is a survival crafting game for your phone. You wash up on a wild island. Gather wood, stone and iron by day, craft tools and build a camp, and survive the nights when shades come out of the dark. Survive 10 nights and a passing ship spots your fire.

## Controls

| Action | Touch | Keyboard |
|---|---|---|
| Move | Drag anywhere on the left side | WASD / arrows |
| Act (chop, mine, pick, hit, add fuel) | Big orange button (hold to repeat) | Space |
| Eat | EAT button | E |
| Craft and build | CRAFT button (gold dot = something is ready) | C |

The ACT button changes its label to show what it will do: CHOP, MINE, PICK, HIT or FUEL. A dashed ring marks the target.

## Survival bars

**HP** (red): reach 0 and the run ends. It regenerates when you are fed and warm, faster beside a fire.
**Food** (orange): drains slowly. Berries give +14. Raw meat gives +12, but meat eaten beside a fire is cooked and gives +40 and +10 HP. Catch rabbits for meat.
**Warmth** (blue): falls at night unless you are in firelight. A Torch slows the loss. At 0 food or 0 warmth you lose HP.

Structures are placed just in front of you, in the direction you are facing.

## Nights

Each day lasts 100 seconds; night lasts about 45. Shades spawn in the dark, and each night brings more and faster ones. From night 4, big Brutes appear that smash walls. Shades avoid firelight and burn inside it, so they circle your camp and wait for the fire to die. Banished shades drop ember, which you need for armor and the brazier.

## Tips

- Build your first fire before night 1 and stock at least 6 spare wood to keep it fed.
- Ring the fire with walls on the side shades come from.
- Bushes regrow in 45 s and trees and rocks in about 80 s, so you never run out.
- Iron glows orange and is found near the coast.
- Arrows on the screen edge point to shades out of view.
