Zone Fall: How to Play

Zone Fall is a top-down battle royale for your phone. 30 players drop onto an island: you and 29 bots. Loot weapons and gear, fight, and stay inside the safe zone. The last one standing wins.

Controls (phone)

Action	Touch	Keyboard / mouse
Move	Drag anywhere on the left half	WASD / arrows
Aim	Drag on the right half	Mouse
Fire	Push the right stick far out	Hold left click
Pick up	GRAB button (lights up near loot)	E
Swap weapon	SWAP	Q
Heal (+50 HP, 2.5 s)	HEAL	H
Reload	Automatic when empty	R
Pause	II button (top right)	P / Esc

Aim assist gently pulls your aim toward the nearest enemy in front of you.

The match

Landing truce: for the first 40 seconds the bots hold fire. Use it to grab a gun from a building.

The storm: the safe zone is the bright circle. The dashed white circle shows where the next zone will be. The top bar counts down to the next shrink. Outside the zone you take damage that rises with each of the 6 phases, the screen edge turns purple and an arrow points you back.

Loot: 5 weapons (Pistol, SMG, Shotgun, Rifle, Sniper) in 4 rarities (Common grey, Rare blue, Epic purple, Legend gold; up to +45% damage). Armor (blue bar) soaks 60% of incoming damage. Medkits heal 50 HP but slow you while healing. Ammo crates refill your reserve. Buildings hold better loot. Enter through the door gap on the bottom wall; roofs turn see-through when you are inside.

Tips

- Shotguns win close, snipers win far, rifles and SMGs do everything in between.
- Rocks and building walls stop bullets; trees do not.
- Water slows you down, so avoid fighting in it.
- Heal behind cover: getting hit cancels the heal.
- Start moving to the next circle before the timer ends.

Your games, wins, best placement and total kills are saved on your device.
