Sprout Vale — How to Play

Goal

You have one year (4 seasons of 7 days) to turn an overgrown plot into a thriving farm. Your score is the gold you have saved at the end of Winter 7. Medals: Bronze Basket 3,500g, Silver Sickle 6,000g, Golden Harvest 9,000g.

Controls (phone)

Pick a tool on the bottom bar, then tap a tile. **Drag your finger** across tiles to work a whole row at once.

Hoe: turns grass into soil (3 energy), smashes rocks (4), clears withered crops, picks up placed items.

Water: waters soil (1 energy, 1 can charge). Tap the pond in the top-left corner to refill.

Seeds: choose a crop for this season; planting costs its seed price.

Harvest: tap any glowing, ripe crop with any tool. Harvesting is free.

Place: put down sprinklers and scarecrows you bought. **Shop:** buy upgrades. **Sleep:** end the day.

A day on the farm

Days run from 6am to 2am (about 2.5 minutes). Actions also move the clock. If you are still up at 2am you pass out: the doctor takes 10% of your gold and you wake with 60% energy.

Watered crops grow one day each night. Rain, storms and snow water everything for you. Storms can flatten one crop.

Everything in your bag ships overnight. The Order Board asks for a set number of one crop within 4 days and pays double for them.

Crows may eat an unprotected crop at night. A scarecrow protects every tile within 3 squares.

When the season changes, crops from the old season wither. Clear them with the Hoe.

Crops

Spring: Turnip (20g, 4 days, 60g), Starberry (70g, 7 days, regrows every 3, 70g).

Summer: Sun Corn (50g, 8 days, regrows every 3, 66g), Moon Melon (90g, 9 days, 330g).

Autumn: Ember Gourd (100g, 10 days, 390g), Bogberry (75g, 6 days, regrows every 3, 62g).

Winter: Frost Pea (35g, 5 days, 110g), Snow Kale (50g, 6 days, regrows every 3, 60g).

A season has 7 days, so long crops only pay off if you water them every day or let rain help. The seed list warns you when a crop can't ripen in time.

Shop

Copper Can 350g (holds 40) · Hearty Stew 220g (+30 max energy, up to 2) · Sprinkler 150g (waters the 8 tiles around it every morning, up to 6) · Scarecrow 120g (up to 4) · Chicken 300g (1 egg a day worth 40g, up to 4).

Tips

Start with turnips and plant only what you can water. Buy chickens early: they pay for themselves in about a week. Sprinklers free up energy to expand. Fill orders for double gold.
