# Shadow Crew — How to Play

## Goal

You are the cyan crewmate. Seven bots share the station with you, and 1 or 2 of them are secret **impostors**. The crew wins by finishing every task (the bar at the top) or by voting out every impostor. The impostors win if they get you, or once they equal the number of crew left.

## Controls (phone)

**Move:** touch anywhere and drag, like a joystick.

**USE** (big cyan button): hold it while standing at one of your glowing yellow task consoles. A ring fills in 3 seconds.

**REPORT** (red button): lights up near a body, or at the SOS button in the Mess (one emergency meeting per game).

On a computer: WASD or arrows to move, E or Space to use, R to report. The music-note button mutes sound.

## Meetings

When a body is found, everyone gathers. Read what the crew says: who was seen near the body, and who was with whom. Lines starting with "You noticed" are what you saw yourself, so they are always true.

Impostors lie: they accuse innocents and cover for each other. Anyone who accuses someone you know is innocent is suspicious.

Tap a name to vote, or Skip. The most votes ejects that player, and you learn whether they were an impostor. A tie or a skip majority ejects no one.

## Tips

Your vision is limited, and impostors only strike when nobody is watching. Stay near other crew.

Note who wanders alone into rooms with no task.

Bots: Easy has 1 impostor; Normal and Hard have 2, and Hard kills more often.
